

Preventive Maintenance

Biosealer® TC

Order No.: S873SSMW

Benefits

- Consistently robust sealing of thermoplastic tubes
- Optimized equipment performance
- Trouble-free operation; reduction of downtime
- Compliance with regulatory requirements

Product Information

The objective of preventive maintenance is a continuous, precise operation of your equipment, to secure your investments for the long term and to guarantee correct and proper function.

Preventive maintenance will be performed in accordance with Sartorius' fixed standards and in between the contractually stipulated time intervals between the customer and Sartorius.

Specifications

- Inspection visit at fixed intervals or as needed
- Visual inspection
- Maintenance check and cleaning according to maintenance checklist
- Temperature calibration
- Test sealing of customer-specific tube types
- Pressure test (optional)
- Issue of maintenance | test report

Repairs, spare parts as well as travel costs and expenses are not covered in scope of services and will be invoiced separately.
